

DESIGNED FOR EXPLOSION-PROOF ENVIRONMENTS

- Available in 24VAC/DC
- Built-in gain control
- Produces 90dB to 114dB @ 10' (100dB to 124dB @ 1m)
- UL Listed, CSA Certified, CSFM Approved
- NEMA 3R, IP44 enclosure

SelecTone® Explosion-Proof Audible Signaling Device

Model 302X

Federal Signal's SelecTone® Model 302X is a solid-state audible signaling device for indoor and outdoor explosion-proof environments. The unit consists of a re-entrant horn, speaker, and audio amplifier. All internal amplification circuitry, gain control and tone modules are contained in a rugged die-cast aluminum amplifier housing.

The 302X is UL (Underwriters Laboratories) Listed and CSA (Canadian Standards Association) Certified for Class I, Division 1, Groups B, C & D.

Model 302X is offered in 24VAC/DC. It will amplify tone and voice when used with SelecTone Command Units, including the 300MB, 300MC, 300VSC-1, 300VSC-1044SB, 300SCW-1 or 300SSC. Command units allow from four to six of the available tones (depending on the command unit) or voice messages to be selected and amplified.

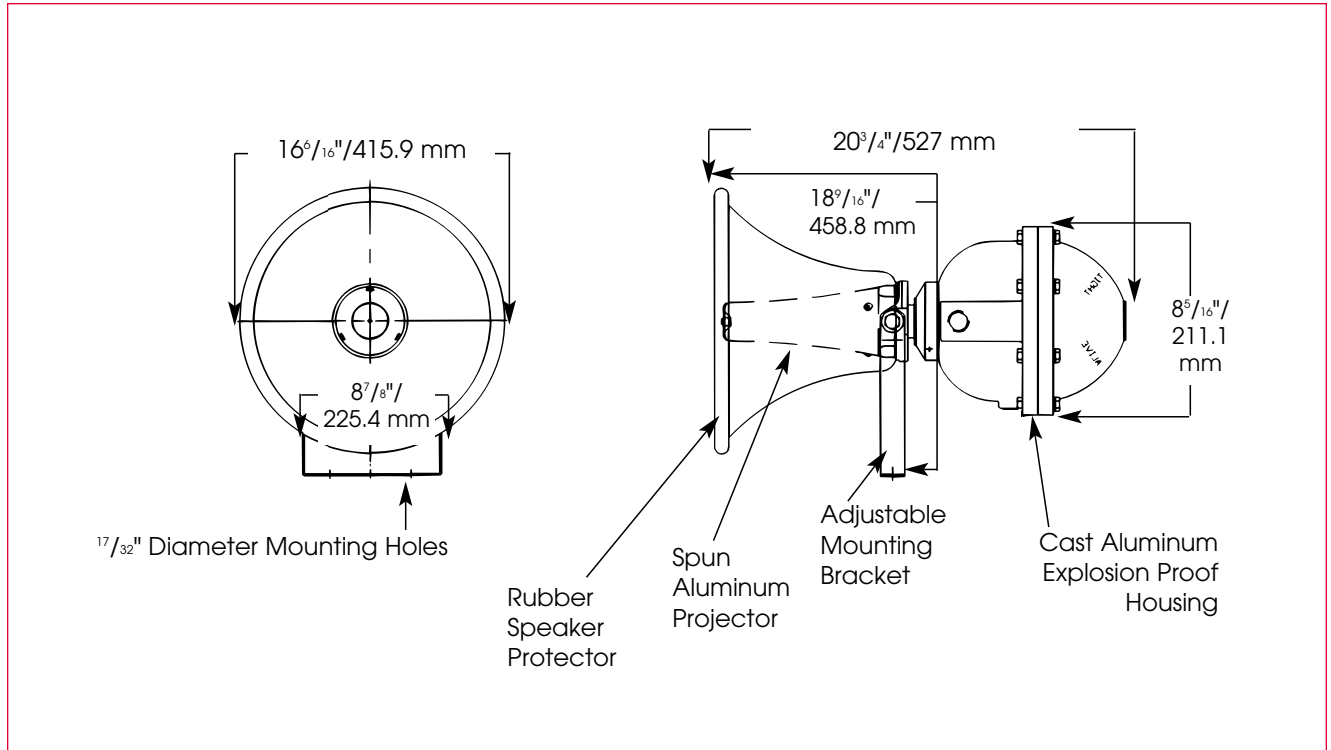

Internal gain control allows tone output adjustment from 90dB to a maximum of 114dB @ 10 feet (100dB to 124dB @ 1m).

The 302X can be used individually or as part of a plant-wide warning and communications system where very high noise levels exist. Typical applications include emergency warning, start and dismissal, evacuation alarm, paging and process controls.

Model	Voltage	Operating Current	Sys. Standby Current	Decibels @
